NEXT GEN PAYMENTS

Payment solutions built for integration. Ready when you are.

iStream is launching the next generation of its payment platform, a ground-up modernization of the APIs, portal, onboarding, and security architecture behind our ACH, RDC, and account infrastructure. Designed for enterprise platforms, ISVs, and partners who need payment rails that integrate the way modern software expects.

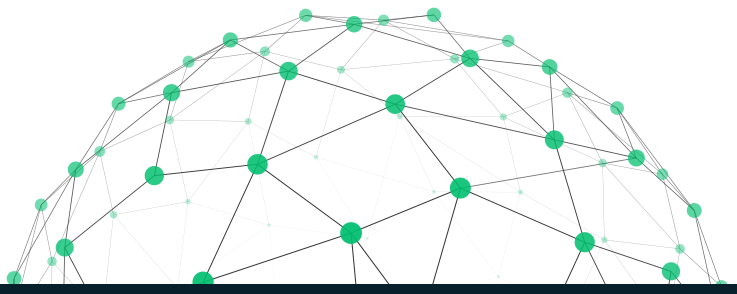

Launching Fall 2026. Integration planning starts now.

Capabilities

- **Real-Time Webhooks & Event Notifications**
  - Know the moment a transaction is submitted, settles, returns, or fails. Webhook-driven architecture replaces batch files, no waiting on overnight processing
- **Modern REST APIs**
  - Fully rewritten APIs designed for fast, clean enterprise integration with your existing architecture
- **Instant-Access Developer Sandbox**
  - Explore the environment, submit test transactions, and run testing scenarios in minutes. No login, no sales call, no paperwork required
- **Self-Serve Onboarding with Automated Underwriting**
  - Board new clients and merchants in a fraction of the time with automated application, underwriting, and approval workflows
- **Enhanced Security & Modern Authentication**
  - Modern login methods backed by a hardened security architecture built for financial-grade workloads
- **Unified Client Portal**
  - A new, modern portal bringing RDC and ACH management and visibility into one place

Benefits

- **Integrate in Weeks, Not Months**
  - Modern APIs, clear documentation, and a no-friction sandbox mean your developers can start today
- **Eliminate Batch-File Lag**
  - Real-time event notifications keep your systems and your customers in sync with every transaction
- **Faster Time to Revenue**
  - Automated onboarding gets your clients live sooner
- **Evaluate Before You Commit**
  - Your technical team can validate the fit in the sandbox before a single contract is signed
- **Built on Proven Rails**
  - The modern developer experience sits on top of 21+ years of compliant, bank-partnered payment processing
- **Dedicated Relationship Manager**
  - Personalized support and a single point of contact

Client Testimonial

"Two things stand out about working with iStream. First, the ability to reach a real person. Their responsive, cross-trained team consistently goes the extra mile to improve our processes and the end-user experience.

In a world dominated by call prompts and AI, this human connection is rare and invaluable. Banking is technical and high-risk, so being able to speak openly without judgment helps us address issues and solutions quickly.

Second, iStream's collaborative mindset. Rather than taking a rigid approach, they work with us to identify solutions—even if it means extra work on their end. Leveraging their decades of expertise and treating them as an extension of our team has been instrumental to our success." – Ben Kirkland

Markets and Partners

- Property management
- Retail
- B2B payments
- Bill payments (insurance, healthcare, utilities)
- Non-profits
- Payment gateways
- ISVs
- ISOs
- Insurance & benefits administration (ICHRA)

How it Works

The new platform unifies iStream's payment rails: ACH, RDC, credit card payments, and account infrastructure. All behind a single set of modern REST APIs with webhook-based event notifications.

Your developers start in the instant-access sandbox: explore the environment and submit test transactions with no login required. When you're ready, self-serve onboarding with automated underwriting moves you from evaluation to production quickly.

Get Started

Be first in line.
Enterprise integrations take planning, start yours before launch.
